

Dental Practices and Nursing Homes

LEGIONELLA (L8) RISK ASSESSMENT, TANK CLEANING & DISINFECTION

Britewater Treatment is a Water Hygiene and Legionella Auditing company carrying out work throughout the UK and Ireland in the water treatment industry. The company is very active within the Nursing Home & Dental Practice sectors helping customers comply with all statutory regulations. Duties under HSE, The Health and Safety at Work etc Act 1974 (HSWA) require you to carry out a Legionella Risk Assessment. We are now offering an annual 'WaterCare' monitoring package.

Package Includes-

1. **Legionella Risk Assessment** carried out to BS8558:2011 and L8 ACOP guidelines, and HTM 01- 05 and HTM 04 - 01. This will entail us visiting your premises and carrying out a survey of plumbing systems, produce a CAD Schematic and producing a document which will be emailed to you. A list of defects will be highlighted and a control scheme produced.
2. A **Water Hygiene Folder** left on site and thermometer and a system put in place to monitor Legionella on a monthly basis - Temperature monitoring/checking exterior water is temperature is 20 - 45°C - weekly flushing etc.
3. **Training** given to responsible nominated person.
4. A **six monthly site visit** by one of our engineers to ensure paperwork and records are up-to-date.
5. **Tanks and Cylinder Chlorination and Disinfection** carried out to BS 8580:2010 on plumbing system by our dedicated disinfection team and certificate issued to ACOP L8.
